Achievements of the Organization
(Part 3 of Page 1)

With about 29% of Africa's population lacking access to clean water, this increases the risk of many life-threatening diseases.

Our campaign aims to take action by sending our heartfilled volunteers to the sparse continent of Africa. Partnering with local governments, and hiking to multiple remote villages to give people the resources that they desperately need.

Ongoing Activities:

- Delivery of food and water
- Construction of small wells
- Building linkage paths in small bodies of water

Future Activities:

- Construction of water pumps, to start in mid-2024
- Promoting education amongst the youth about water salination and hygiene, planned to start in February 2024

Vision:

Give 100% of the African population
accessss to renewable, clean water

Mission:

We empower individuals to inspire others
regardless of their economic status in this
world.

How to participate?

The QR code provided below will give you
access to our Google Forms, you may
choose to donate water which we will ship
manually or venture to Africa yourself by
using our special code that we give every
month to get a 25% discount on flights and
hotels.
